

In order to ensure the relevance and quality of the information on the webpage (<http://bilvaskehaller.dhigroup.com/>) DHI, has decided to update the information on the webpage this year and introduce a new procedure for the future. This means that some of the listed products have to be re-evaluated *if* they are still on the market.

A yearly update will be prepared in January and after a re-evaluation, products will be listed for another 3 years before they have to be evaluated again (**i.e. products have to be re-evaluated every third January**). If products are not re-evaluated or are no longer on the market they will be removed from the webpage!

The following time line is planned for up-coming updates:

- If your product has been evaluated and uploaded *before* January 1, 2013 a re-evaluation has to be conducted before January 2016. *DHI must receive product information no later than **September 15, 2015**. If no product information has been received by this date, the products will be removed from the webpage.*
- If your product has been evaluated and uploaded *after* January 1, 2013 a re-evaluation is planned for January 2017. DHI must receive product information no later than **September 15, 2016**.
- All **new** evaluations (first time evaluations) are valid for a period of 3 years starting on the first following January (i.e. if for example your product has been evaluated May 26, 2016, the new evaluation is due January 1, 2020).

Due to the fast changing knowledge on chemicals and their effects on humans and the environment, it is necessary for DHI to perform a new data search and assessment at the re-evaluation. Therefore, the cost for re-evaluations will follow the pricing listed on the web page (http://bilvaskehaller.dhigroup.com/bilvaskekemikalier/info_til_leverandoerer.html). If, however, several products are evaluated at once, a quantity discount can be given.

All information on the products must be sent to Tina Slothuus (tsl@dhigroup.com) and/or Kristina Buus Kjær (kbm@dhigroup.com).
